We have really enjoyed our learning in Year 6 so far and look forward to our next areas of study!
This term we are starting our new topic of Greek Mythology, with a particular focus on the myth of Icarus. We will be looking at a range of non-fiction texts related to Ancient Greece and then moving on to reading our new text Tales of the Greek Heroes. In Science we shall be extending our learning on animal species, with a particular focus on Charles Darwin and his theory of Evolution. We hope you have a spectacular term of learning!

What is my child learning this term?

**MATHS**

**Shapes**

We will be starting our learning focusing on measure, beginning with finding the area and perimeter of shapes. We will then be moving on to learning the rules of angles in shapes and using these rules to find missing angles and exploring 2D and 3D shapes. After this, we will be looking at other forms of measure, such as measuring capacity, length and weight.

**Angles**

**ENGLISH**

**Icarus**

This term we will be exploring Icarus and will be going to see a modern adaptation of this Greek myth at the National Theatre. Through drama, we shall explore the different characters in the story and debate about the decisions that they make. We will also be exploring how various artists have depicted the myth and how these differ.

**SCIENCE**

**The Theory of Evolution**

In science this term we will be continuing our studies on animal species, with a focus on birds. We will then be researching Charles Darwin and exploring his theory of Evolution and how it has made a significant contribution towards modern science.

Thank you

Ms ffrench, Ms Smith, Mr Waite and Ms Charles
