

Hill Mead Primary School

Reminders

Swimming:

We have completed our term of swimming. Children will go again in Year three.

PE

Red is Monday

Blue is Wednesday

Please ensure that your child has a full PE kit: White t-shirt, tracksuit bottoms or black shorts.

We will be doing PE outside so please include suitable trainers in their kit.

Children must not wear their PE kit to school. On PE days please send your child in in their uniform with their kit in a bag.

Homework

Maths homework will be sent home on Friday. It will be based on the addition, subtraction, multiplication and division. Please look at the example on each sheet, so that you can support your child with the method that we use in class.

Reading and **writing** journal homework will be sent on Fridays.

All homework is due in by TUESDAY.

Year 2

Summer Term 6 2010

Welcome back!

This is your child's final term in year two. The year has flown by and they have achieved a huge amount already. The children have now completed all of their SATs and the teachers are beginning to write the end of year reports where you will be able to see what progress they have made. This term we will be preparing the children for their September transition to key stage two. It is really important that we all continue to encourage and support the children in their school work right up to the end of the year.

What will my child be learning this term?

NUMERACY	Money Time	We will be focusing on money and time this half term as it is an area the children have found very hard. We will also continue to work on our addition, subtraction, multiplication and division in preparation for Year three.
LITERACY AND DRAMA	The little mermaid and the night pirates	We will be looking at a range of play scripts this term to allow the children to write and produce their own play. There will be lots of drama as well as looking at making leaflets and invitations to publicise their production.
ART	Designing the set, costumes and props for the Year 2 play.	In preparation for our end of year production, the children will be designing and making costumes, masks and props for the set of our play.
SCIENCE	Properties of materials	This term we will be looking at which materials conduct and insulate electricity and heat as well as finding out which materials are flexible and stretch.
DT	Designing boats that float	Following our science experiments last term, we will be trying to design and make a boat that can float on water.

A day at the seaside:

As our work in the summer terms has been based around life in and around the sea, we will be trying to organise a trip for the whole of year 2 to go to the seaside. The trip is not yet confirmed. If we are able to go we may need some parents to come along. If you are interested, please let your child's class teacher know. Look out for a letter by the end of week two with more details..

Thank you

Ms Huszar, Mr Harris, Ms Smith and Mrs White
